The figure displays a grid of 120 small plots, organized into 8 rows (A-H) and 12 columns (1-12). Each plot shows a time series of 'media' values. The y-axis for each row is labeled with a letter (A-H) and the x-axis is labeled with numbers (1-12). The plots show a general upward trend in the 'media' values over time, with some fluctuations. The data is generated from a model where the 'media' value increases over time, with some noise added.
